Brand New Book ***** Print on Demand *****.Excerpt from A Treatise on Architecture and Building Construction, Vol. 3: Prepared for Students of the International Correspondence Schools Scranton, Pa; Star Building, Ornamental Ironwork Roofing, Sheet-Metal Work Electric-Light Wiring and Bellwork, With Practical Questions and Examples 1. Stair building grew out of the necessity of securing an easy and safe passage from one level, or floor, to another. Such a passage might therefore be regarded in its inception as an inclined plane which connects two horizontal planes and provided with a series of equal risers, or steps, formed for the purpose of giving a sufficient footing to facilitate travel. The construction of wooden stairways is considered the highest branch of joinery; more care and knowledge are required in their planning, more ingenuity in setting them out, and more skilful workmanship in their execution, than in any other work about a building. The architect, in studying the plan and treatment of a stairway, should consider its adaptability for the building in which it is to be placed. its proposed situation. the weight likely to come upon

Reviews

Unquestionably, this is actually the greatest function by any author. I was able to comprehend every little thing using this created ebook. Its been printed in an remarkably straightforward way which is merely following i finished reading this ebook in which in fact altered me, alter the way i think.
